geonkim76@gmail.com | 469-927-1700 | Buford, GA 30519 | <https://geonkim76.github.io/>

CAREER SUMMARY

Business Systems Analyst with 3+ years bridging operational data and business decisions in manufacturing heavy environments. Build ETL/BI pipelines, dashboards, and forecasting models that move measurable outcomes.

WORK EXPERIENCE

SK Battery America – Commerce, Georgia

Jan 2025 – Present

Business Systems Analyst | Data & Analytics

- **Operational Analytics:** Built SQL- and Python-driven workflows across WMS, MES, and RTDB systems to improve visibility into production and inventory performance.
- **Process Improvement:** Reduced recurring material-loss issues by ~89% by identifying failure points, improving reconciliation logic, and standardizing operational checks.
- **Data Quality:** Improved data integrity by ~30% and cut reconciliation effort by ~40% through automated exception monitoring and multi-source validation.
- **Reporting Infrastructure:** Designed near-real-time telemetry and reporting pipelines that reduced processing latency from 12 minutes to 2 minutes.
- **Decision Support:** Developed and maintained 20+ dashboards used by operations and leadership to monitor KPIs, investigate root causes, and support day-to-day decisions.
- **Cross-Functional Execution:** Partnered with Operations, Maintenance, and IT teams to translate workflow pain points into KPI frameworks, reporting tools, and scalable process improvements.

Hyundai Mobis — (Contract via Brainer Consultancy) – Montgomery, Alabama

May 2023 – Jan 2025

Software Engineer I

- **Workflow Tools:** Built internal workflow and reporting tools with SQL Server-backed applications, improving process execution efficiency by 27%.
- **Dashboard Optimization:** Improved dashboard performance by 17% through query optimization, backend tuning, and reporting-layer improvements.
- **Stakeholder Delivery:** Gathered requirements from business and operations teams, translated needs into technical solutions, and supported rollout, testing, and adoption.
- **Operational Visibility:** Developed dashboards and reporting logic that surfaced bottlenecks, improved issue tracking, and enabled faster decision-making across teams.

Aramark – Seoul, Korea

June 2022 – Aug 2022

Information Technology Intern

- **Systems and Data Support:** Supported regional Microsoft Intune rollout efforts and maintained Oracle SQL for an IoT transportation service, writing queries, troubleshooting data issues, and assisting with operational reporting.

TECHNICAL SKILLS

Languages & Tools: Python (pandas, NumPy), SQL (Oracle, SQL Server), C# / .NET, Git/GitHub, Jupyter

Data & BI: Power BI, Tableau, Spotfire, ETL/ELT pipeline design, KPI standardization, root-cause analysis

Tools / Platforms: Jira, Confluence, Git/GitHub, .NET/C#, SAP ERP, SQL Server, Oracle, AWS, S3

Business & Product Operations: Excel, Google Sheets, forecasting, scenario analysis, experiment support, stakeholder communication

Certifications: Google Business Intelligence, DP-900, Lean Six Sigma Yellow Belt

EDUCATION

University of Pennsylvania – MSE, Data Science (online) 4.0/4.0

Aug 2025 - Present

Master of Science in Engineering in Data Science Online

The University of Texas at Dallas – BS, Computer Engineering 3.51/4.0

Aug 2019- May 2023
